## DETAILED ACTION

A. This action is responsive to the following communication: Amendment After Non-final Rejection filed: 02/01/2011.

### *Allowable Subject Matter*

1. Claims 1-5 and 8-14 are **allowed**.

The following is an examiner's statement of reasons for allowance: Independent claims 1, 9 and 14, when considered as a whole, are allowable over the prior art of record. Specifically, the prior art of **Battat teaches** the limitation: "providing navigation tools to allow a user to travel through a virtual representation of a network's hierarchical structure; agents are placed within the system to monitor activity of the network devices and relay the status of the devices to the user of the system". But the claims recite a different combination of limitation: **specifically from claim 1** "SAN manager program capable of generating an adjacency matrix, said SAN manager program capable of facilitating direct data transfers between storage devices without server intervention, said SAN manager program utilizing information gathered in the generating of prior SAN perspectives topology viewer including memory for storing information pertaining to previously requested topology perspectives... a topology viewer linked to the SAN manager to generate a user requested topology perspective according to data included

within the SAN management database and data associated with a previously requested topology perspective, said topology viewer enabled to generate a view of physical connections given a selection of a logical connection", herein referred to as "Limitation A", that is not suggested or shown by Battat. **Specifically from claims 9 and 14** recite: "receiving a request to provide a perspective of a SAN topology; analyzing the request at a topology viewer and sending the request to a SAN management program for adjacent nodes; receiving adjacent nodes from the SAN management program by the topology viewer and comparing them against a topology viewer cache to identify modes already included with an adjacency matrix; determining by the topology viewer those nodes which should not be in the adjacency matrix; calculating data paths within the requested perspective which have not been previously calculated; utilizing information gathered in the generating of prior SAN topology perspectives by the SAN management program from memory in the SAN management program allocated for that purpose, generating the requested perspective according to both the previously calculated data paths and the calculated data paths; and, enabling the generation of a view of physical connections given a logical data connection", herein referred to as "Limitation B", that is not suggested or shown by Battat.

The prior art of **Moore teaches** another combination, "a plurality of virtual volumes implemented by a storage controller, the volumes being a unit of logical storage, wherein the plurality of virtual volumes are structured by the storage controller based on a graph structure; wherein graphs may be represented as a collection of adjacency lists, as an adjacency matrix", but does not suggest the Limitation A or B.

The prior art of **Deere teaches** another combination, "...generate a set of leaf nodes, then generating an adjacency matrix from said set of leaf nodes", but does not suggest the Limitation A or B.

Further **Battat, Moore and Deere teach** the combination limitation:  
"...generating a virtual representation of a hierarchical network, by generating an adjacency matrix from leaf nodes of hierarchical structure", but the claims recite a different combination of limitation "Limitation A or B", that is not suggested or shown by Battat, Moore or Deere alone or in combination.

The **dependent claims** further add limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable. Therefore the claims are allowed over the art because the claims differ in scope that is not seen or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
